 **IO-Link**

## **MetalHead<sup>TM</sup> Ceramic Coated All Metal Sensing Proximity Sensors**

- Long range sensors for automated machinery
- One-piece stainless steel housings
- Extremely robust and weld spatter resistant
- Senses all metals at the same range (steel, aluminium, copper, stainless, brass)
- Available in M8, M12, M18 and Rectangular Flatpack
- Ideal for machines that need to sense metal targets at longer sensing distances

**MetalHead<sup>TM</sup> Ceramic Coated All Metal Sensing Proximity Sensors with IO-Link** are the best choice for weld spatter resistance and the detection of ferrous and non-ferrous targets at long sensing distances. This IP69K lineup is extra durable, and comes standard with the ability to integrate with IO-Link devices for process optimization.
