- 3) For use with shielded type proximity sensors only.
- 4) Thread sensor into probe only until proper "On/Off" triggering is achieved, do not thread sensor in fully or damage will occur.
- 5) Custom lengths and diameters are available. Call for quote.

Smart Rest Pad

Use Quick Release Collars as a "smart rest pad" for tooling and fixturing. With sensors protected by Quick Release Collars you can rest castings or work pieces right on your sensors. Quick Release Collars can take the load and adjustments are easy via the threaded housing. Sensors confirm part positioning to initiate machining, welding or other control cycles.
